# 1. Getting Started

## 1.1. Before Start

Before start you should have a basic knowledge in html, css3. Is very easy to configure, remember that you can contact us and do your questions, well. We recommend to use as editor [sublime text](#).

You can view this template in any web browser from your desktop computer. Because the files are written in HTML, you do not need an internet connection in order to display or edit the template.

Once you have downloaded the files from ThemeForest, open the html folder. this folder you will find three folders js, css, img, you will find 32 html.

## 1.2. Installation

- It's important to understand that you must either have your own server space or use someone else. The server space can be purchased at many different places around the internet. You need somewhere to put the files that you purchased so others can find them online.
- Start your FTP client (I personally use Filezilla which is free) and login. Login to your server. You will need your server name (often times this will be your domain name), username, and password that you setup with the hosting company.
- Find the folder you want to upload domain template files to your server. You will want to click and drag all the files that you have marked. within the html folder, which includes the 4 folders (css, img, js and php) files. html you want to display.
- Once the files are made up, you can access the site.

### 1.3. Html Structure

This theme has a responsive design with variation of column layouts depending on the page. This theme is based on bootstrap 3.3.5 - 1170px (12 columns), which will help streamline any customization you want to perform. If you are unfamiliar with grid system, be sure to read about it [here](#).

The main structure of this site is wrapped in a "container" div, followed by a "row" div. These div Within each section is given a site's home grid size equaling all 12 columns long.

This topic has the following structure has a slide or section, and footer content, this is the following structure:

```
<!--Layout Theme Options-->
<div id="layout">
  <header class="menu-standar"> ☰
</header>

  <div class="margin-top-section lookbook-detail">
    <div class="row"> ☰
    </div>

    <div class="container"> ☰
    </div>
  </div>

  <footer class="light-footer paddings"> ☰
</footer>
</div>
<!--Layout Theme Options-->
```

## 1.4. Css Structure

We are using a master file of CSS (style.css). he ten additional stylesheets.

Style sheets are located in the folder "CSS" and its subfolder, Only recommended modifying the file in which will be able to change the theme colors, and is in css / skins / name\_color.css

We have a content list:

-----	
Stylesheet Guide	
-----	
1. Import styles	
2. Basic Elements	
3. Preloader	
4. General Structure	
- Header Image	
- Cart Empty	
- BreadCrumbs	
- Main Title	
- Menu General Structure	
- Slider	
- Products Items	
- Product Hover	
- Stay Connect - Collections	
- Newsletter Box	
- Gallery Portfolio	
- About	
- Giftcard	
- Pagination	
- Selector Select	
- Filter Portfolio	
- Aside Accordion	
- Tab Content	
- Aside Shop and Blog	
- Blog	
- Pagination Big	
- Shop Container Widht	
- Contact Information	
- Login and Register Zone	
- Lookbook	
- Error Page	
- Checkout Section	
- Quickview	
- Footer	
- toTop	
-----	

### 1.5. Javascript Structure

The Javascript folder is "js" and Inside it, there are folders, too. the name of each folders does references to the function of each files.

For example, in the folder "js" there is a folder with name "fancybox", this folder does reference to the lightbox's functions.

Also, in the javascript folder there are one files called "main.js", this file executes the functions of the scripts that are in the folders.this file is divided with the next structure:

```
<!-- ===== JQuery libs ===== -->
<!-- jQuery local-->
<script type="text/javascript" src="js/jquery.js"></script>
<script src="js/jquery-ui.1.11.3.min.js"></script>
<!-- Bootstrap.js-->
<script src="js/bootstrap/bootstrap.js"></script>
<!--Accordion-->
<script type="text/javascript" src="js/accordion/accordion.js"></script>
<!--Lightbox-->
<script type="text/javascript" src="js/fancybox/jquery.fancybox.js"></script>
<!--Animations-->
<script type="text/javascript" src="js/animations/wow.js" ></script>
<!--Totop-->
<script type="text/javascript" src="js/totop/jquery.ui.totop.js" ></script>
<!-- Carrousel -->
<script src="js/carousel/carousel.js"></script>
<!-- Twitter Feed-->
<script src="js/twitter/jquery.tweet.js"></script>
<!--Theme Options-->
<script type="text/javascript" src="js/theme-options/theme-options.js"></script>
<script type="text/javascript" src="js/theme-options/jquery.cookies.js"></script>
<script type="text/javascript" src="js/theme-options/jquery.easing.1.3.min.js"></script>
<!-- Filter -->
<script src="js/filters/jquery.isotope.js" type="text/javascript"></script>
<!--FUNCTIONS-->
<script type="text/javascript" src="js/main.js"></script>
<!-- ===== End JQuery libs ===== -->
```

## 2. Custom

### 2.1. Skins Theme

javascript via:

If you want to change some color in the website, you should go to this url **js/theme-options/theme-options.js** you will find some like this:

```
// Skin
var skin = "red"; // blue, green, orange, purple,
red, yellow, cocoa

// Layout
var layout = "layout-wide";
// layout-boxed, layout-boxed-margin ,layout-wide

// Background
var bg = "bg3"; // bg3(default), none, bg1, bg2,
bg4, bg5,
```

and just change per color that you want (blue, green, orange, purple, red, yellow, cocoa)

If you want to change by color 'purple' only you need to change

```
var skin = "purple";
```

the same way happens if you want to change the layout or background

css via:

Also, if you want a different color, go to **css/skins/** and duplicate the file and replace the color for yours:

```
a:hover, a:hover,
.flat-mega-menu > ul > li:hover > a,
.flat-mega-menu .drop-down.full-width ul li
a:hover,
.pagination > li > a:hover, .pagination > li >
span:hover, .pagination > li >
a:focus, .pagination > li > span:focus,
.filter-toggle .active,
.nav-tabs > li > a:hover,
.description-product:hover i,
.flat-mega-menu .drop-down li .footer-bag .view-
bag:hover a{
    color: #c2a325; //change by your prefer
                    color
}
```

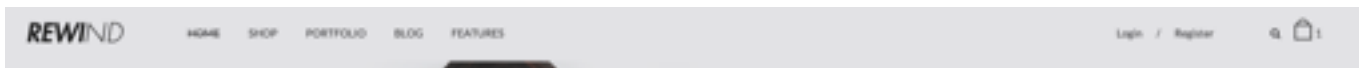

**if you have doubts please, write to [support@iwthemes.com](mailto:support@iwthemes.com)**

## 2.2. Headers

This theme has three (3) versions of header that you could use:

*Standar Header (gray):*

it's defined in the majority of our html files:

```
<header class="menu-standar">
  <!--Menu-->
  <div class="row">
    <div class="col-lg-12">
      <div class="flat-mega-menu">
      </div>
    </div>
  </div>
  <!--Menu-->
</header>
```

### Header Dark:

### White Header:

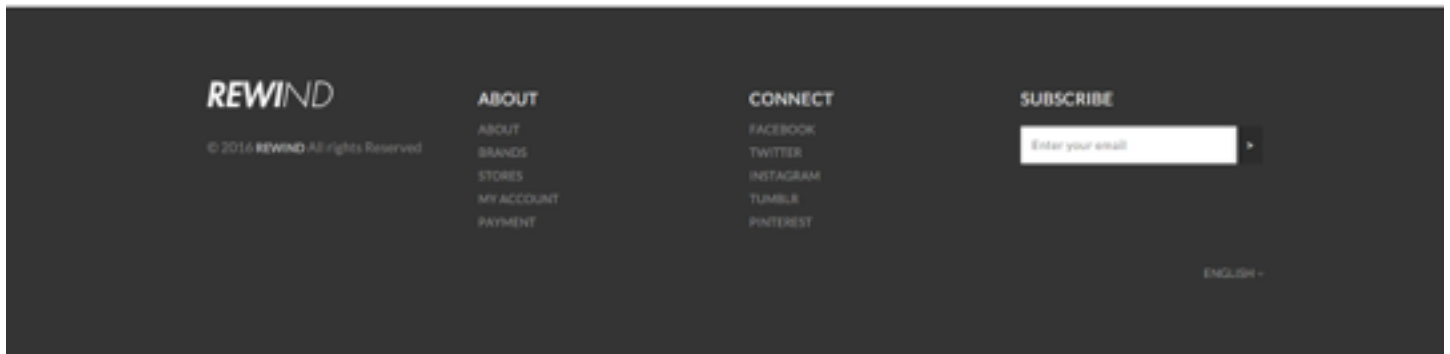

```
<header class="menu-standar menu-white">
  <!--Menu-->
  <div class="row">
    <div class="col-lg-12">
      <div class="flat-mega-menu">
      </div>
    </div>
  </div>
  <!--Menu-->
</header>
```

### 2.3. Footers

This theme has three (2) versions of footer that you could use:

Footer Dark:

it's defined in the majority of our html files:

```
<footer class="padding margin-top-section">
  <div class="container">
    <div class="row text-uppercase">
    </div>
  </div>
</footer>
```

White Footer:

If you want to use this footer style in other file of site, open “portfolio-fullwidht.html” and copy the code adding class “light-footer”

```
<footer class="light-footer paddings">
  <div class="container">
    <div class="row">
      <!--Menu-->
      <div class="col-lg-2 col-md-2 col-sm-2">
      </div>
      <div class="col-lg-2 col-md-2 col-sm-2">
      </div>
      <div class="col-lg-2 col-md-2 col-sm-2">
      </div>
      <div class="col-lg-2 col-md-2 col-sm-2">
      </div>
      <!--Menu-->

      <!--Social-->
      <div class="col-lg-4 col-sm-12 col-xs-12">
      </div>
      <!--Social-->

      <!--copy-->
      <div class="col-lg-12 col-sm-12">
        <div class="copy top-mini right">
          <p>&copy; 2016 <a href="#">REWIND</a></p>
        </div>
      </div>
      <!--copy-->
    </div>
  </div>
</footer>
```

## 2.4. Buttons

	<p>class <i><u>"boton-arrow"</u></i>  example:  &lt;div class="boton-<i><u>arrow</u>     &lt;a href="#"&gt;shop now          &lt;i class="fa fa-angle-right"&gt;&lt;/i&gt;      &lt;/a&gt;  &lt;/div&gt;</i></p>
	<p>class <i><u>"boton-dark"</u></i>  example:  &lt;button type="submit" value="Submit"  class="boton-dark"&gt;add to cart  &lt;/button&gt;</p>

## 2.5. Contact Form

The file that you need is located in  
[php/send-mail-contact.php](#)

```
<?php
    $to = "jm@iwthemes.com"; /*Your Email*/
    $subject = "Messsage from Enter"; /*Issue*/
    $date = date ("l, F jS, Y");
    $time = date ("h:i A");
    $Email=$_GET['email'];
    $Name=$_GET['name'];
    $Subject=$_GET['website'];
    $Message=$_GET['message'];

    $msg="Message sent\n
    Email : $Email\n
    Name : $Name\n
    Subject : $Subject\n
    Message : $Message\n";

    mail($to, $subject, $msg, "From: $_GET[email]");
    echo "<div class='alert alert-success'>Thank you for your message :D<
?>
```

## 2.6. Newsletter

The file that you need is located in  
[php/mailchip/newsletter-subscribe.php](#)

To customize write us to support@iwthemes.com. It would be a pleasure to help you.
